## 26<sup>th</sup> EARSeL Symposium

### NEW DEVELOPMENTS AND CHALLENGES IN REMOTE SENSING

Presentations can be related to all fields of remote sensing applications and especially to those listed below, since sessions will be organized

according to these topics:

- New sensors and instruments
- Image processing techniques
- Coastal zone management
- Oceanography
- Water and atmosphere
- Agriculture, land use and forestry
- Urban remote sensing
- Geological hazards
- Forest fires
- Imaging spectroscopy
- Land degradation
- Data fusion
- 3D Remote sensing
